

京都大学大学院教育学研究科 ・ グローバル教育展開オフィス

- 受給者 **Emmanuel Manalo先生**
(**Cognitive Psychology in Education, Professor**)
- 国際交流活動名：Multimodal Learning Analytics for Assessing and Understanding Learning Processes
- 主催者/主催団体等：Dr Rebeca Cerezo, University of Oviedo, SPAIN
- 実施場所・方法：Kyoto University, Faculty of Education Main Building, Meeting Room 1.
- 実施日：2025/4/23
- 参加者数：合計7名

活動の概要

In Dr Cerezo's presentation/talk, she explored innovative approaches to assessing learning in context through different methodologies: eye-tracking, log traces, automatic emotion recognition, self-reports, and so on. She explained that the aim of such approaches is to make it possible to bring together all these measures for a better understanding of learning process. If we can make these techniques accessible to educators and institutions, they have the potential to promote greater transparency and fairness in educational decision-making processes. In the talk, Dr Cerezo went through techniques, solutions and ongoing projects. At the end of the talk, there was a lively Q&A session and discussion.

In the days following her talk, Dr Cerezo had meetings with several graduate research students and another visiting researcher to discuss research and potential collaborative work.
